C. Choose your Plan Option

This plan offers 3 Plan options that you can choose from depending on your Protection and Investment needs:

- 1) Invest Plus Option:** An option that provides life cover and takes care of your Investment needs by providing accumulated Fund Value at Maturity.
- 2) Premium Waiver Option:** An option that takes care of all your financial responsibilities in your absence. In case of your (Proposer's) unfortunate death, all future premiums shall be waived to make sure that your fund does not stop growing. Thus, we make sure that we continue to build the corpus on your behalf for the dreams you have for your loved ones. The Policy continues with risk cover for Life Assured and the accumulated Fund Value is paid on Maturity. On death of the Policyholder, the Life Assured will become the Policyholder. In case the Life assured is a minor, then on attaining age 18 years, the Life assured automatically becomes the Policyholder and the erstwhile Policyholder/ Proposer continues to be the premium Payor under the Policy.
- 3) Golden Years Benefit Option:** The right blend of Retirement planning for you is to not only build a corpus for your golden years, but also make sure you leave a legacy behind for your loved ones. This plan option offers you the solution to build your fund value while also having life cover for whole of life (till 99 years of age). You can opt for systematic withdrawal facility to generate recurring post retirement income from your accumulated fund.

Option once chosen cannot be altered throughout the policy term. Charges will vary as per the Plan option chosen.

Choose how you want to manage your Investment Portfolio

You have a choice of **10 different funds** that helps you manage your money as per your risk appetite. You can also opt for **Systematic Transfer Plan (STP)** which gives you the benefits of rupee cost averaging.

- Unit linked insurance products are different from traditional insurance products and are subject to the risk factors.
- The premiums paid in Unit Linked Insurance policies are subject to investment risks associated with capital markets and the NAVs of the units may go up or down based on the performance of funds and factors influencing the capital market and the insured is responsible for his/her decisions.

Dividing by the number of units existing at the valuation date before any units are allocated/redeemed, gives the unit price of the fund under consideration. We round the resulting price to the nearest Re. 0.0001. This price will be daily published on our website and in leading national newspapers. Units shall only be allocated on the day the proposal is accepted and results into a policy by adjustment of application money towards premium.
