The unit price of Unit Linked Funds shall be computed as: Market Value of Investments held for the fund plus the value of any current assets plus any accrued income net of fund management charges less the value of any current liabilities less provision, if any. This gives the net asset value of the fund. Dividing by the number of units existing at the valuation date before any new units are allocated/redeemed, gives the unit price of the fund under consideration. We round the resulting price to the nearest ₹ 0.0001. This price will be published on our website and in leading national newspapers.
